

JKV-16PS2R

16-port 19" Rackmount KVM Switch w/ Front-panel Buttons and Keyboard Hotkey Control

This KVM Switch is designed for computer/server management on a centralized single admin desk in corporate, factory as well as in campus computing environment. It also features a hot-plugging capability that allows you to plug off and on the KVM cabling without powering down a whole rack of servers, especially convenient when you are working on a server rack.

Robust and Reliable for Corporate Server Room / Industrial Floor

The Rackmount KVM Switch is robust and durable in metal enclosure and provides better shielding against electromagnetic interference commonly seen in lab or factory environments. The metal case offers a sturdy protection needed to withstand accidental impact.

Centralized Rackmount Management

The KVM Switch features a console port to connect your shared keyboard, video and mouse, and 16 PC ports to connect to your computers/servers. The rackmount design offers a neat placement of the KVM Switch units on the rack for centralized management and also for security enhancement that could be provided by a locked server room. You can simply place it on desktop or mount it on a standard 19" rack for more secured and centralized management.

Features

- 16-port 19" Rackmount KVM Switch in metal enclosure
- PS/2 style keyboard and mouse control
- Direct channel selection and operation using Front-panel push buttons and keyboard Hotkeys
- Support for DOS, Windows 95/98/SE/ME/2000/XP, Linux, etc.
